## CAREER OBJECTIVE

---

Hi there,

I'm Md Atikur Rahman. I'm a Full Stack Web Developer with 5+ years of experience building modern web applications and scalable systems. Currently a Computer Science & Engineering student at State University of Bangladesh.

Experienced in developing government service platforms, SaaS applications, and business systems using Laravel, Next.js, and MySQL. Successfully delivered dozens of web applications, including payment systems, rental platforms, SMS reseller systems, and large-scale web dashboards.

Strong expertise in API development, system architecture, and third-party integrations, including payment gateways, SMS gateways, and external APIs.

Passionate about building scalable digital platforms that solve real-world problems and improve service accessibility.

## SKILLS

---

### Backend:

- PHP (Core & Advanced)
- Laravel Framework (REST APIs, MVC, Repository, Authentication)
- JavaScript (Server-side integrations)
- Node.js (*Basic – for lightweight services & problem-solving*)
- Python (*Basic – scripting & problem-solving*)

### Database:

- MySQL
- MongoDB

### Frontend:

- JavaScript
- ReactJs
- NextJs

### Library & Technologies:

- jQuery
- Ajax

### Operating System:

- Mac OS
- Windows
- Linux (Ubuntu)

### Tools & IDE:

- Git, GitHub
- PhpStorm
- Vs Code

# KEY PROJECTS

---

## 1. Smart Municipal Management System – Fully Digital & Cashless Municipality Platform

**Technologies:** Laravel, MySQL, Laravel Queue, Scheduler, REST API, SMS Gateway, bKash, Nagad, EkPay

Developed a full-featured [Municipal Management System](#) that digitizes all municipal services and enables citizens to access services online through a Citizen Portal. The system allows residents to apply for certificates, pay municipal fees online, and track application status in real time.

Integrated bKash, Nagad, and EkPay payment gateways to implement a fully cashless municipality system, along with automated SMS notifications for service updates.

## 2. Barivara – Smart To-Let & Rental Property Listing Platform

**Technologies:** Laravel, MySQL, JavaScript, Bootstrap, NextJs, ReactJs, Tailwind, Google Maps / Location APIs

Developed [Barivara](#), a rental property listing platform built with Next.js frontend and Laravel REST API backend. The system allows users to search rental listings using advanced filters and enables property owners to post listings through a structured multi-step workflow. The platform includes a responsive UI, admin dashboard, and location-based property management using a MySQL database.

## 3. SMS Reseller Platform with Multi-Gateway API Integration

**Technologies:** Laravel, MySQL, REST API, Queue System

Developed a scalable [SMS Reseller Platform](#) that allows administrators to purchase SMS from multiple gateway providers and resell them to customers.

Users can send SMS via a web panel, upload Excel files for dynamic bulk messaging, manage phonebooks, and integrate SMS functionality into their own applications using a secure API.

Implemented advanced features such as multi-gateway routing, SMS analytics, spam detection, and phone number blocking.

## 4. PaymentHub – Centralized Multi-Website Payment Monitoring System

**Technologies:** Laravel, MySQL, Payment Gateway APIs

Developed a centralized payment monitoring system ([PaymentHub](#)) that tracks transactions from multiple websites using a single bKash and Nagad merchant account.

The platform aggregates payment data from different projects and provides a unified dashboard for monitoring revenue, viewing transaction reports, and analyzing payment activity.

## 5. Smart Union Parishad Management System – Digital Local Government Service Platform

**Technologies:** Laravel, MySQL, Laravel Queue, Scheduler, Bkash, Nagad

Developed a complete [Union Parishad Management System](#) to digitize local government services and improve administrative efficiency. Citizens can request services directly from the homepage without a separate portal, while administrators manage applications, records, and payments through a centralized dashboard. Integrated Bkash, Nagad for secure online payment collection and used Laravel Queue & Scheduler for background task automation.

## WORK HISTORY

---

Full Stack Web Developer Barivara.net – Part-time	04/2025 – 03/2026
Full Stack Web Developer Redmo IT & digital solutions – Part-time	07/2025 – 12/2025
Web Developer Redmo IT & digital solutions – Full-time	07/2021 – 07/2024

## EDUCATIONS

---

Studying BSc in Computer science and engineering  
State University of Bangladesh

Year: 3<sup>rd</sup>  
CGPA: 3.74/4.00  
Complete Credit: 73/140  
Session: 2024-2025
